

Georgia VA 1:1 comparison

This study, a partnership between the Military Family Research Institute (MFRI) at Purdue University and the Center for a New American Security (CNAS), provided one-to-one comparisons of care quality in VA and nearby non-VA medical centers. One nearby comparator hospital was identified for each full-services VA medical center in the United States using a set of demographic criteria: size, rurality, teaching status, ownership, and proximity. Data was available for us to be able to compare 125 VA medical centers and their comparators.

We compared three clinical outcomes (in-hospital surgical deaths per 1,000 surgical discharge, catheter infections per 1,000 service days, and MRSA infections per 1,000 bed days) and three patient experience outcomes (“definitely recommend” hospital to family and friends, discharge instructions and overall hospital ratings).

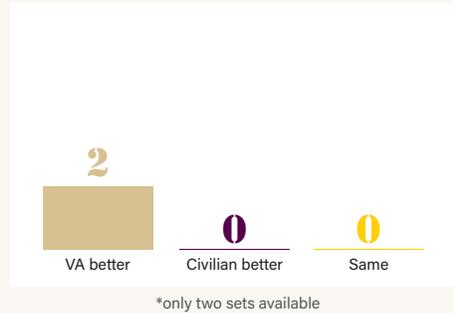

How did the hospitals do?

CLINICAL OUTCOMES

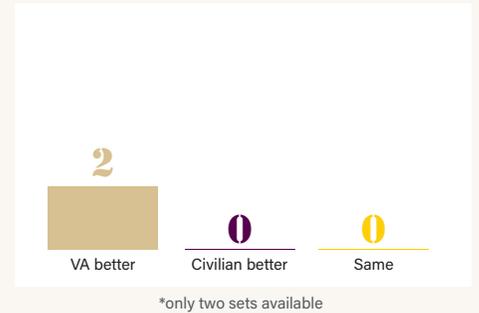

Catheter infections per 1,000 days*

MRSA infections per 1,000 bed days*

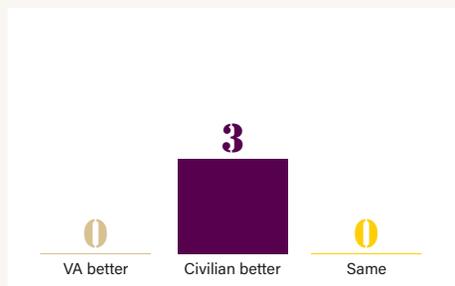

Surgical deaths per 1,000 discharges*

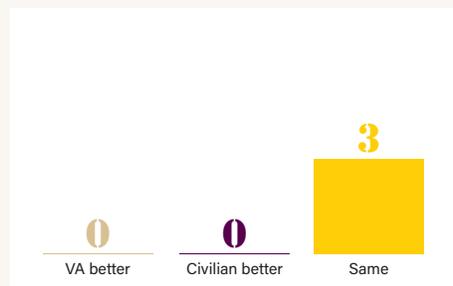

PATIENT EXPERIENCE OUTCOMES

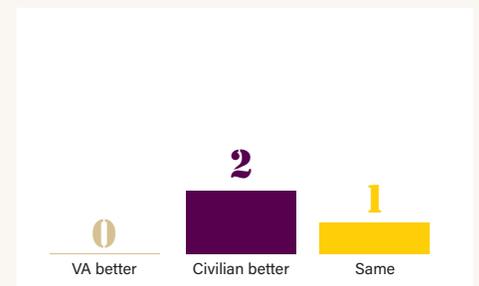

Definitely recommend to others

Discharge instructions

Overall hospital ratings

HOSPITALS COMPARED

There are three VA medical centers in Georgia. Comparator hospitals were identified for those. The number of hospital/VA medical center pairs available for comparison for clinical outcomes criterion one was one; criterion two was two; criterion three was two. For patient experience outcomes there were three pairs for all three.

- » Atlanta VA Medical Center :: Emory Decatur Hospital
- » Charlie Norwood VA Medical Center- Uptown Division :: University Hospital
- » Carl Vinson VA Medical Center :: Dodge County Hospital
